

**Stay Alert—Expose Belt Cover
Wear Before It Shuts You Down**

A visionary idea in conveyor belt monitoring.

ContiAlert is the first and only conveyor belt innovation to let you see belt wear in real time. The red bonding layer below the top cover is exposed when it's time to change the belt, providing:

› **Cost savings**

Identifying belt wear allows you to get the most out of your current belt. Knowing when to change your belt helps prevent downtime and increase uptime.

› **Predictability**

In conjunction with our [ContiAlert calculator](#), customers can enter their current belt life data and determine how much time is remaining before the carcass is exposed.*

Availability

ContiAlert early warning feature is available for any abrasion-related application using our Pylon Plus* premium multi-ply construction in combination with our premium abrasion-resistant compounds.

› **Belt Specs**

Pylon Plus* 220/2 to 600/3 with 3/16" x 1/16" to maximum 3/8" x 1/8" covers.

Abrasion-resistant compound specs

Defender Plus*, Stacker*, Survivor* and Survivor Plus*

Flame retardant compound specs

FR-2G and FRAR-2G
